

  
**BEDOUIN**

### Liberate Your Workspace

The workplace has evolved. Employers and staff demand so much more from their office space than just a place to sit. They need collaborative spaces for meetings, private distraction-free areas for productive working, break-out zones and much more besides.

It's time to embrace a new way of working. We designed our 'Liberate' collection to respond to the needs of the modern workplace. It offers flexible solutions that break free from the confines of the traditional office environment.

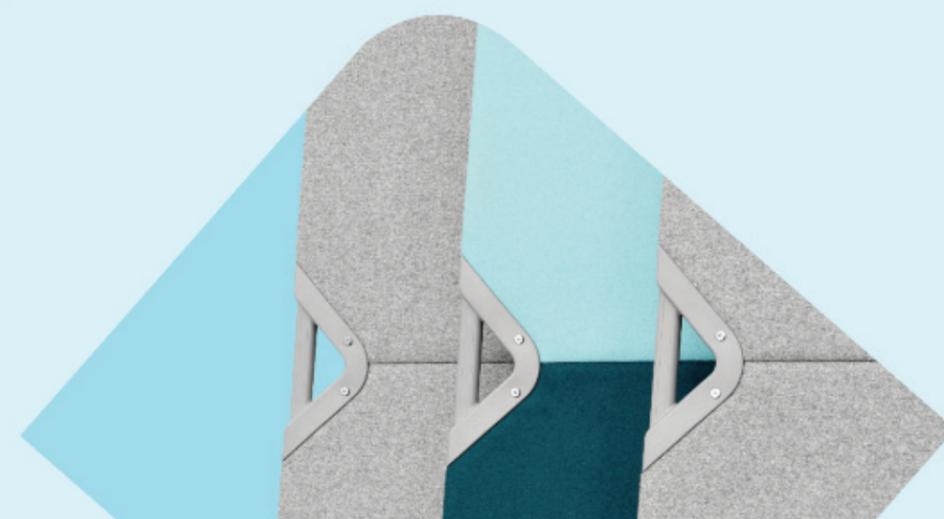

Alongside Nomad and Khamsin, Bedouin is our third product in the series. The seed of the idea behind Bedouin came from an experience in a noisy coffee shop. An alcove by the bar absorbed ambient sound to create a quiet spot and it got us thinking how useful a 'movable alcove' could be.

### What is Bedouin?

Working closely with product designers BroomeJenkins, we developed Bedouin: a unique freestanding mobile screen that can be used in countless ways to create a pocket of calm wherever you need it. A simple yet effective solution, its innovative design saw it shortlisted for a coveted 2017 Mixology Award.

Available in two heights, Bedouin can be easily glided into position and re-positioned as needed. Use it as a single unit, or in a group, to provide privacy, acoustic protection and visual concealment. It's the perfect solution for open environments. Use the tall unit, complete with a short hood, as an impromptu phone booth or group it with other Bedouin to form an instant meeting area, then nest them neatly away again when you are done.

### The Benefits

- Bedouin is a truly flexible solution with a huge variety of uses.
- Create privacy as you need it in open plan environments.
- Use as a single unit or in a group of other Bedouin.
- Easy to move with integrated handles and castors.
- Offers acoustic and visual protection.
- Can be neatly stacked together when not in use, then brought out as required.
- Available in two heights.
- Stable, freestanding unit with elegant design.
- Can be covered in a huge range of fabric colours to complement any office scheme.
- Mixology Award-nominated design.

## The Applications

Position, re-position, stack away, position again! Bedouin is easy to move and easy to use. With effective acoustic properties, they are ideal as room dividers or to create touchdown clusters, workbooths and solo workspaces. Utilise them for common areas and meeting spaces, for lone working or break out spaces. The possibilities are endless.

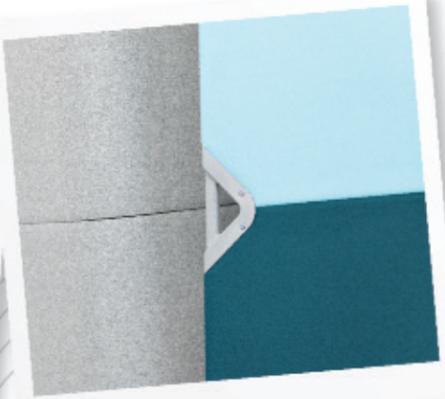

Available in two heights, use Bedouin individually or mix and match them together. The tall Bedouin unit has a hood, making it the ideal booth to step into to take a call. It is also available with an integral shelf, giving you a handy space to take notes or rest your iPad.

The low Bedouin has no roof and is designed to be the perfect height for a sit down meeting; highly mobile, you can pull a few together to create an instant meeting space or use just one for a simple solo touchdown area.

Instant meeting room

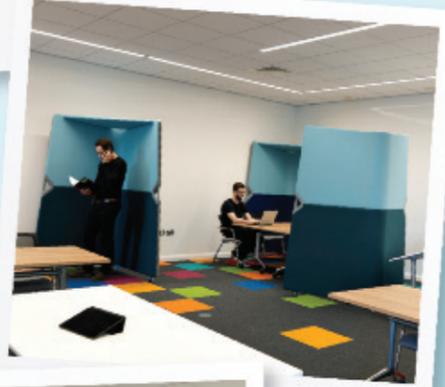

Ergonomic handles

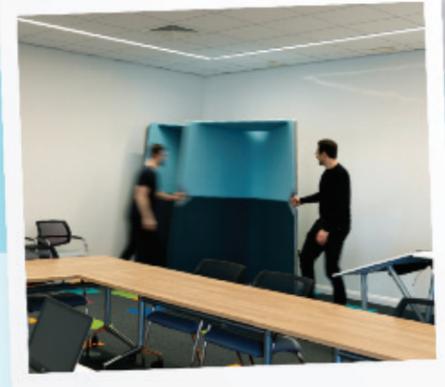

Stackable shape

Acoustic insulation

Nest neatly together to store

Easy to move

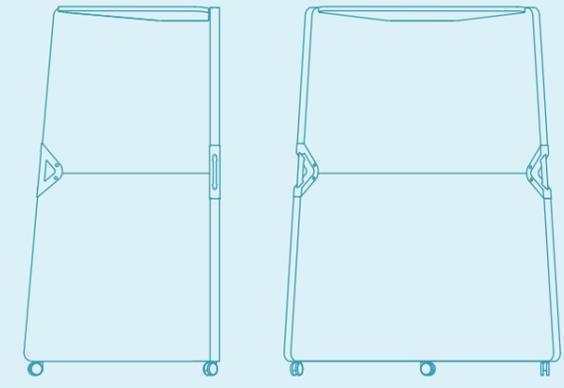

Multi-functional and mobile

### Specification

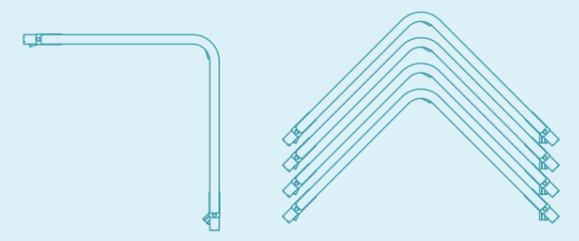

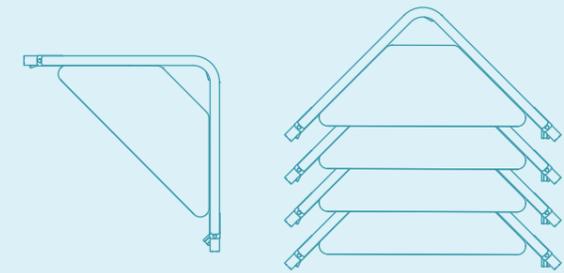

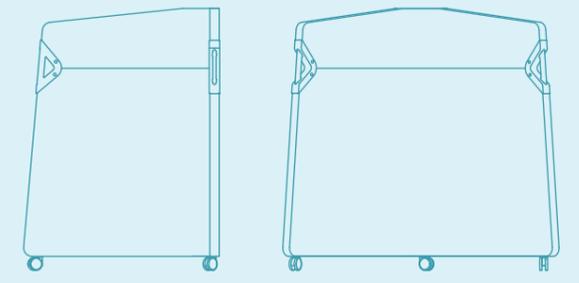

Every screen is manufactured in our Yorkshire factory and hand finished to the highest specifications.
