

# Tube

*Designed by Studio Kairos*

**KOLEKSIYON**

Your office habitat may  
re-create your working habits.  
Now, it's time to  
re-work your office.

Tube is designed by Studio Kairos as an abstract stacking of volumes that provides a rich variety of utilities. While the cabinets serve as storage units, the empty spaces created between the volumes present exciting alternative areas of use, both to store or to display.

A fresh solution for storing documents and objects in the new work habitat. Replacing the rhythmically replicated typical file cabinet with doors, the design brings a new approach to the layout options and use of alternative volumes and spaces created while composing its elements.

According to their positioned height and function, the cabinet modules have door options for; opening up, folding down or pull-out drawers. With its refined outlines and detailing, the box has more of a sculptural effect than that of a furniture with doors or handles.

The way the compositions are used, brings a unique character to the product for each set up, where life begins in the voids among the volumes, books, for magazines, flowers, lamps, ceramic or glassware, etc., composed in the principles of "open work", no project would look alike, even using the same elements.

# Technical Specifications

## Tube

### Materials & Finishes

- Side and middle dividing panels have lacquer and veneer finish options on MDF.

- Drawer front panels, doors, top, bottom and back panels have lacquer and veneer finish options.

- Metal legs are epoxy painted 40x8 mm (1.6x0.3 inch) metal sheet.

- Drawers are on 13 mm (0.5 inch) MDF with folio-coated form.

### Fastening Elements

- Interconnections among the panels are made via wood dowels.

- Connection of drop doors are made via special drop door mechanism and special hinges, whereas special lift door mechanism is used for lift doors.

- Fully-opening rails are used for drawers.

- Interconnections among the cupboard units consist of special axles and puller elements.
