800 SERIES

800 Series Storage

Versatile, durable & space efficient for any application

Planning space involves thinking about storage. What is stored, where it is stored and why it is stored are key to creating a productive and cost effective working environment. Making the best use of space reduces real estate costs, however more substantial savings and productivity gains will be achieved by addressing staff needs, work methodology and team adjacency.

KI's 800 Series collection of storage represents the most advanced system of its kind available. Manufactured in the UK utilising state of the art automated technology, KI 800 Series is compatible with KI's full portfolio of workplace furniture.

The 800 Series is a comprehensive storage system for every application; available in numerous dimensions, finishes and locking options.

Made in the UK | 25 year warranty

Lockers

Personal storage such as lockers are the cornerstone of the modern, agile working environment. Lockers facilitate flexible working and allow visitors to find somewhere safe to store their belongings. Whether located in large centralised banks, or adjacent to workstations, lockers become a valued anchor for workers operating in offices where they do not have an assigned workstation.

- Various configurations, sizes and finishes
- Multiple colour finishes within each unit
- Postal slots
- RFID/NFC locks
- Combination locks
- Traditional key/barrel locks
- Business card or label holders
- Smart lockers - for converting lateral file drawers to lockers

Convert lateral file drawers to lockers

For organisations with an extensive installed base of lateral drawers, KI's innovative SmartLocker (pictured, left) is a cost-effective way to increase the provision of personal storage.

Lateral Files

Optimised for filing A4 media, KI's lateral drawer units can optimise space efficiency as well as worker organisation and retrieval of files. Customisable to suit any needs, these units can be positioned adjacent to workstations, or away from desks to create shared storage areas. Strong, stable and secure, they feature soft closures as standard, helping maintain a pleasant office soundscape. By placing multiple units around an open plan environment, these storage units can help delineate 'neighbourhoods' or even create secluded quiet, breakout areas. This has been shown to help improve productivity and wellbeing in open plan offices, where many people can feel overwhelmed by the size and distractions of the space.

- Various configurations, sizes & finishes
- Multiple colour finishes within each unit
- RFID/NFC locks
- Combination locks
- Traditional key/barrel locks
- Worktops, glass tops, cladding & sloping top options
- Pass-throughs and top-box options
- Varies pull handle options
- Flush seamless back panels

Cupboards & Bookcases

From small, end-of-desk cupboards to coat cupboards, bookcases and large core storage, these units are versatile and essential components of any office environment. Optimised for A4 media storage, they seamlessly integrate with workstations to create a harmonious workspace with adjacent storage and display facilities.

- Various configurations, sizes & finishes
- Multiple colour finishes within each unit
- RFID/NFC locks
- Combination locks
- Traditional key/barrel locks
- Worktops, glass tops, cladding & sloping top options
- Pass-throughs and top-box options

Recycling & Waste Units

Secure, confidential waste and recycling units can be designed and manufactured in many ways to provide differing types of access. Integrated into the rest of the 800 Series portfolio, they can be a discrete and tidy waste management option.

- Various sizes & finishes
- RFID/NFC locks
- Combination locks
- Traditional key/barrel locks
- Worktops, glass tops, cladding & sloping top options
- Pass-throughs & top-box options
- Full integration with other storage units

Towers

Achieving both generous personal storage and elegant space delineation, storage towers can greatly enhance the wellbeing and comfort of workers in an open office landscape. Research shows that people benefit from a sense of personal space, a 'territory' of sorts – especially in large, noisy open plans. Should a clear line of sight be desired, these towers can be specified at, or below, desk height.

- Three standard heights – below desk, at desk or screen height
- Multiple colour finishes & internal configurations
- RFID/NFC locks
- Combination locks
- Traditional key/barrel locks

Pedestals

Versatile and secure, pedestals ensure personal items are close at hand. Concealed or oversized castors provide the flexibility to support an agile workspace, or provide a perfect alternative to lockers for assigned workstations.

- Various configurations, sizes & finishes
- Multiple colour finishes within each unit
- Optional concealed or oversized castors
- RFID/NFC locks
- Combination locks
- Traditional key/barrel locks
- Upholstered seatpad
- SpaceStation features internal lockable compartment for laptops
- SpaceStation also available in desktop version

Combinations

Each of the variations of 800 Series storage can be configured in infinite combinations to meet the requirements of any space. Whether to define areas within an open plan that are adjacent to workstations, or to provide away-from-the-desk storage, these storage units add versatility and flexibility for all types of storage needs.

Other Enhancements

Storage can play a central role in enhancing workplace strategies. From elegant finish options to functional additions, the following options can create a happier, healthier, more productive working environment:

- Planter boxes – biophilic design has been shown to improve worker wellbeing by reducing stress and anxiety, with the potential to improve air quality in offices. By adding planter boxes to the tops of storage units, companies can introduce a touch of nature to the office environment.
- Sloping tops – add colour and reduce the accumulation of clutter to maintain a tidy workspace.
- Pass-throughs and top-boxes – create extra storage while maintaining an open, lighter aesthetic. Contrasting internal colours can enhance aesthetics and complement surrounding colour schemes.
- Cladding, glass or MFC – wrap steel storage with MFC in numerous finish options to create a soft, warmer appearance. Glass and MFC worktops can create extra opportunities for colleagues to collaborate.
