

GRESHAM

PEDESTALS

PRODUCT DATA SPECIFICATION

GRESHAM

PEDESTALS

PRODUCT DATA SPECIFICATION

A range of pedestals.

Material

25mm top panel with low specular finishes to prevent glare with use of VDT equipment.

High impact resistant ABS edging matching surface finish of MFC. Bonded to the board using synthetic blended polymer adhesives resulting in a durable, hard wearing finish. Solvent and CFC based adhesives are avoided.

Considerations

- Carcass has glued, dowelled and pressed construction for accuracy and longevity.
- Produced in multiple drawer configurations, heights and depths to suit user requirements.
- Drawers have four-sided, foil wrapped construction with rigid MDF base. These are glued, dowelled and stapled together for strength.
- Drawer fronts are separate panels added to the drawer boxes for strength and ease of adjustment.
- Drawer fronts can be supplied with either a selection of handles – for choice or extended to provide finger-pull opening.
- Pedestals are centrally locked with a suited lock which has over 200 differs. The locks can be suited alike or supplied with a master key – operating all storage units within the Gresham portfolio.
- Supplied with two keys – one of which has a collapsible fob to prevent damage or injury when in use.
- Filing drawers are fitted with foolscap filing rails as standard.
- Filing drawers have deep sides allowing alternative items such as bags, laptops, etc. to be stored when not in use.
- Packaged in an adhered, purpose made, recyclable cardboard box.
