Additional information

- Screens are 450 mm shorter than the desks, as the space on the sides is meant for optional shelves.

- If you are not ordering optional shelves and would like the screen to cover the full length between the legs, please order a one size larger screen. E.g., for 1200 mm desk you should order a 1400 mm screen. For this reason, there are two screen options for the desk of 1800 mm length.
